

Questions to the Board of Selectmen for the Center Streetscape project:

- 1) Do we want to bring the Center Streetscape project to the annual Town Meeting?
- 2) Do we want to create an ad-hoc design advisory committee for the aesthetic elements of the project?
- 3) Do we want to pursue undergrounding utilities from Woburn intersection through Wallis Court?
- 4) Do we want to begin the first phase of the project on the east side of the center (Woburn Street side) (or, where do we want to begin the project?)
- 5) Do we want to provide Town Meeting with the choice for an option that doesn't include a traffic signal at the Woburn St intersection
 - a. Phase 1 is Woburn St. -> Town Offices including the reconfiguration of the intersection and the installation of traffic signals
 - b. Alternative Phase 1 is from the Police Station area through to Grant St or Edison Way and minimal repairs and other treatments at Woburn St intersection.
- 6) Do we want to conduct a trial of narrowing Mass Ave between Grant St and Edison Way and eliminating the right turn lane from Mass Ave to Edison Way. (to allow a final decision on the road geometry at this location)

In addition, we have previously asked engineering to prepare a plan to run a trial changing the flow at Harrington Rd / Bedford St and to conduct a trial of eliminating the right turn lane from Mass Ave to Waltham St. This isn't part of the decisions for Phase 1, but is part of the background for the project as a whole.
